

W700 3D Wall Solution

The Queenax Wall Solution takes advantage of space that's often underutilised or overlooked in most facilities: the space along the walls. The Wall Solution allows facility owners to reap the benefits of functional and suspended body weight training while also preserving the open floor space that they need for other group exercises. Available in a variety of lengths and enhanced with a broad range of training accessories and storage solutions, the Wall Solution is ideal for facilities desiring to dedicate space and a higher level of organisation to functional training.
