## Converging Shoulder Press DISCOVERY SERIES PIN SELECTED LINE

### Product Features

#### 1. Independent and Converging Movement Arms

Designed to demand greater balance and core muscle engagement, the independent arm resistance and converging movement path provide a greater range of motion.

#### 2. Counterbalanced Arms

Movement arms are counterbalanced to a 4.5 kg start weight.

#### 3. Ergonomic Handle Grips

Dual horizontal and neutral handles allow for varying position of the shoulder joint.

#### 4. Ratcheting Seat Adjustment

The ratcheting, gas-assisted seat adjustment features a large, ergonomic, over-molded rubber adjustment handle, making it easy and comfortable for exercisers to get the right fit.

#### 5. Weight Tower, Shroud, and Weight Stack

The open and inviting design allows exercisers to easily access the weight stack selector pin and add-on weight lever. The 2.3 kg add-on weight can be engaged with a simple flip of the lever to increase the load. The shroud cap is secured with three fasteners for easy access and maintenance, and the smaller diameter cables are flexible enough to stand up to the rigors of the facility floor.

#### 6. Instructional Placard

Easy-to-understand, large, text-free illustrations demonstrate correct form at a glance and a QR code links to a helpful 30-second instructional video.
